

Installation Guide for the iPod Lesson Installer

This guide outlines the necessary steps to install the iPod Lesson Installer on a Windows environment and the necessary configurations needed in iTunes to use the iLearning Center.

System Requirements

Windows Operating System

iTunes 7.0 or Higher

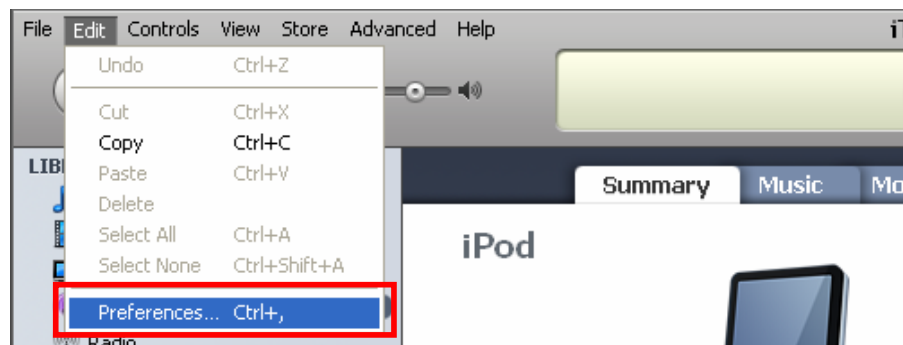

Configuring iTunes...

Step 1: Connect your iPod to the computer. This will automatically open iTunes. Once iTunes is open, you will need to adjust the iPod settings located in iTunes Preferences. There are two ways to access iTunes Preferences:

1) Inside of iTunes *left click* your iPod icon

2) From the menu bar select *Edit* → *Preferences*

Step 2: Be sure that *Enable disk Use* is checked and that *Manually manage music and videos* is **NOT** checked. Click the *Apply* button.

Installing the Installer...

Step 1: The iPod Lesson Installer requires that you have the .NET Framework installed on your PC. If you do **NOT** have the .NET Framework or if you are unsure if you do, click on the *Download Installer with .NET Framework* link. If you have the .NET Framework installed on your PC, click on the *Download Installer without .NET Framework*.

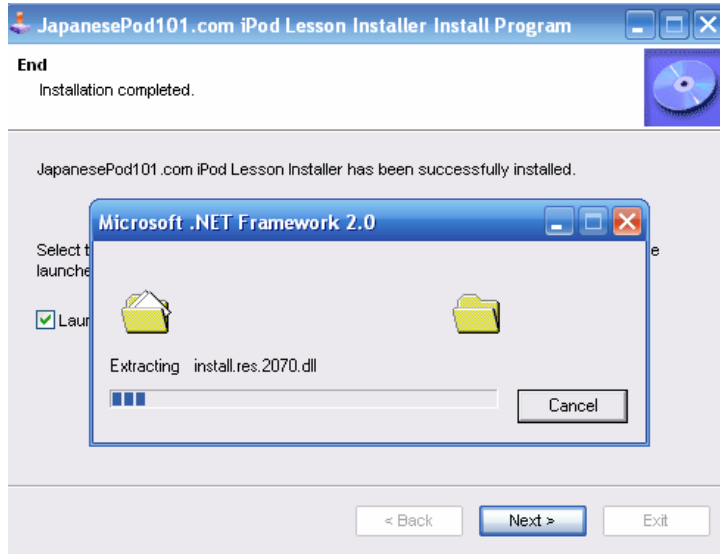

Step 2: When prompted, choose to save the installer on your computer and be sure to remember the location.

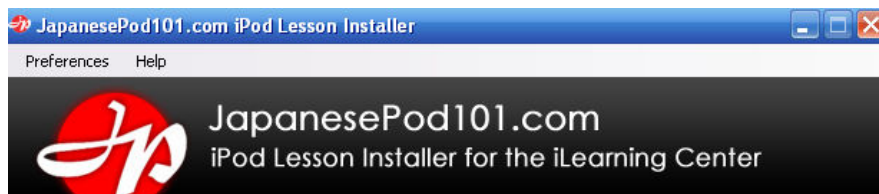

Step 3: Navigate to where you saved the installer and *double click* on it. Follow the on screen instructions.

Note: If you are installing the version with the .NET framework, please wait while the .NET framework is installed on your computer. This could take a few minutes.

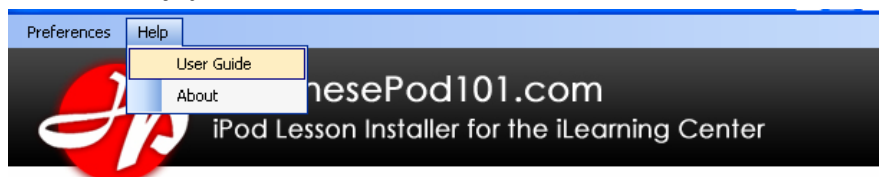

Step 4: Navigate to where you installed the JapanesePod101.com iPod Lesson Installer (from *Start* → *All Programs*) and *click* the installer to launch the installer.

Step1: Does this lesson have both Notes and Sound files?

Step 5: Go to *Help* → *User Guide* and follow the step-by-step directions for using the Installer. Enjoy!

Step1: Does this lesson have both Notes and Sound files?
